Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1,6-7,12-13,18 are rejected under 35 U.S.C. 102(e) as being anticipated by Le Pennec et al(US 6,892,303).

Claim 1: Le Pennec disclose comparison code operable to compare a plurality of compressed malware signatures compressed using compression algorithm with compressed computer file to identify malware within compressed computer file in (col.3,lines 12-15, 39-48).

Claim 7: Le Pennec disclose comparing a plurality of compressed malware signatures compressed using compression algorithm with compressed computer file to identify malware within compressed computer file in (col.3,lines 12-15,38-51).

Claim 13: Le Pennec disclose comparison logic operable to compare a plurality of compressed malware signatures compressed using compression algorithm with compressed computer file to identify malware within compressed computer file in (col.3,lines 12-15,38-51).

Claims 6,12,18: Le Pennec disclose malware includes at least one of computer viruses,Trojan,worms,banned files and e-mails containing banned content in (col.1,lines 55-67).

Claim Rejections - 35 USC § 103

Art Unit: 2135

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 5,11,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Le Pennec et al(US 6,892,303).

Claims 5,11,17: Le Pennec does not specifically disclose Boyer Moore algorithm. Official notice is taken that Boyer Moore algorithm is well known in the art. One of ordinary skill in the art would have been motivated to employ Boyer Moore algorithm in order to achieve a fast efficient string search.

Allowable Subject Matter

3. Claims 2-4,8-10,14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-6 are rejected under 35 U.S.C. 101 because the subject matter is directed to non-statutory subject matter.

Claim 1 is directed to a computer program. In order for a computer program to be statutory it must be tangibly embodied on computer readable medium. The examiner

Art Unit: 2135

respectfully asserts that information does not fall within statutory classes listed in USC 101.

Thus claim 1 is rejected as being directed to data or information with no practical information.

Claims 2-6 do more than provides specific about the data or information as claim 1.

Then claims are also rejected.
